DARK MATTER AND TROJAN HORSES Dark matter is a choice phrase. The concept is drawn from theoretical physics, wherein dark matter is believed to constitute approximately 83% of the matter in the universe, yet it is virtually undetectable. It neither emits nor scatters light, or other electromagnetic radiation. It is believed

Strategic design is about applying the principles of traditional design to "big picture" systemic challenges such as healthcare, education and the environment. It redefines how problems are approached and aims to deliver more resilient solutions. In this short book, Dan Hill outlines a new vocabulary of design, one that needs to be smuggled into the upper echelons of power. He asserts that, increasingly, effective design means engaging with the messy politics - the "dark matter" - taking place above the designer's head. And that may mean redesigning the

How to Design the World: Working Without Solutions In Medium Design everyone is a designer. But design, in this case, inverts the typical focus on object over its settings to concentrate on the medium—the matrix space between objects, events, and ideological declarations. It disrupts habitual modern approaches to the world's intractable dilemmas—from climate cataclysm to inequality to concentrations of authoritarian power. In a series of case studies

Dealing with everything from automation and migration to explosive urban growth and atmospheric changes, Medium Design offers spatial tools for innovation and global decision-making to challenge the authority of more familiar legal or economic approaches. From this perspective, solutions are mistakes and ideologies are unreliable guides. Rather than the modern desire for the new, designers find more sophistication in relationships between emergent and incumbent technologies. Encouraging entanglement, medium design does not try to eliminate problems but rather to put

Design together in productive combinations. And in the process of reconceptualizing design, Easterling puzzles over bulletproof powers, Stanley Kubrick, ISIS recruits, literary characters, and iconic activists in the hope of outwitting political deadlocks and offering forms of activism for modulating power and temperament in organizations of all kinds.

People make use of software applications in their activities, applying them as tools in carrying out tasks. That this use should be good for people--easy, effective, efficient, and enjoyable--is

a principal goal of design. In this book, we present the notion of Conceptual Models, and argue that Conceptual Models are core to achieving good design. From years of helping companies create software applications, we have come to believe that building applications without Conceptual Models is just asking for designs that will be confusing and difficult to learn, remember, and use. We show how Conceptual Models are the central link between the elements involved in application use: people's tasks (task domains), the use of tools to perform the tasks, the conceptual

structure of those tools, the presentation of the conceptual model (i.e., the user interface), the language used to describe it, its implementation, and the learning that people must do to use the application. We further show that putting a Conceptual Model at the center of the design and development process can pay rich dividends: designs that are simpler and mesh better with users' tasks, avoidance of unnecessary features, easier documentation, faster development, improved customer uptake, and decreased need for training and customer support.

What can you do with a degree in architecture?

Architects After

Architecture reframes architecture as a uniquely versatile way of acting on the world, far beyond that of designing buildings. In this volume, we meet forty practitioners through profiles, case studies, and interviews, who have used their architectural training in new and resourceful ways to tackle the climate crisis, work with refugees, advocate for diversity, start tech companies, become

leading museum curators, tackle homelessness, draft public policy, become developers, design videogames, shape public discourse, and much more. Together, they describe a future of architecture that is diverse and engaged, expanding the limits of the discipline, and offering new paths forward in times of crisis. Whether you are an architecture student or a practicing architect considering a change, you'll find this an encouraging and inspiring read. This book is aimed primarily at English-speaking Classical Civilization students taking courses in Virgil, epic and myth at schools, colleges and universities, but will also be of interest to students reading Virgil Aeneid 2 in Latin and to the general reader. The book provides something new for those studying Virgil in translation, offering a detailed and in-depth literary analysis of a single book of the Aeneid, one of the most famous and appealing parts of the whole

poem. The book provides a brief introduction to Virgil and the Aeneid in general, and Book 2 in particular. It also offers literary analysis, in order to enhance critical appreciation and plain enjoyment, making the book really come alive. At the end of each chapter exercises, topics for investigation, and references to other scholars and Classical authors are included to extend the engagement with Virgil. At the end of the book, Appendix A contains translations of other versions of the fall of Troy, and Appendix B

In this deeply moving memoir, one of Canada's most respected singer-songwriters traces his difficult, often tumultuous relationship with his father. From the time Dan Hill picked up a guitar at age 11, he tried to win the approval of Daniel Hill Sr., a man who has been called Canada's father of human rights. But Hill Sr. set impossibly high standards for himself and

his family, especially for his eldest son, leading to conflict and alienation even as young Dan achieved international fame and success. Through vivid family stories, letters, memories and his own award-winning lyrics, Dan Hill tells the story of two parallel lives—his father's in mid-20th-century America and his own as a young black man coming of age in suburban Canada—and the stormy but ultimately loving way each of those lives affected the other.

reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret

Around the world, a new architectural form is emerging. In public places a progressive architecture is being commissioned to promote open-ended, undetermined, lightly programmed or un-programmed interactions between people. This new phenomenon of architectural form - Pavilions, Pop-Ups and Parasols - is presaged by rapidly changing social

relationships flowing from social media such as Facebook, Twitter and Instagram. The nexus between real and virtual meeting is effectively being reinvented by innovative and creative architectural practices. People meet in new and responsive ways, architects meet their clients in new forums, knowledge is 'met' and achieved in new and interactive frameworks. It contrasts bluntly with the commercially structured interactions of shopping malls and the increasingly deliberate interactions available in cultural institutions. These experiences imbue a new type
