Tadao Ando | arc
Tadao Ando (born in 1941) is one of the world's most renowned contemporary architects. At first a boxer, he decided to pursue architecture two years after graduating from high school. He is the only one to have won the discipline's four most prestigious prizes: the Pritzker, Carlsberg, Praemium Imperiale, and Kyoto Prize.

This book showcases recent houses by the world-renowned Japanese minimalist architect, offering unprecedented access to his thought process through more than 100 photographs, line drawings, sketches, and plans. Tadao Ando is one of the best-known and most influential contemporary architects with a minimalistic aesthetic and love of natural materials like glass and concrete—proof that less is more. This volume features ten houses and examines his approach to these designs. Viewed as a collection, these houses serve to demonstrate the wide range of Ando's prodigious genius through lavish and striking photographs. Characteristics of his work include large expanses of unadorned architectural concrete walls combined with wooden or stone floors and large windows. He uses simple methods to solve complicated and small spaces and turns them into spaces with breathtaking landscapes. With precise and beautiful photographs accompanied by Tadao Ando's sketches, drawings, and plans, this volume presents several unseen and little published works, from the Bosco Studio and House facing the Pacific Ocean in Oaxaca, Mexico (2014)to a penthouse in Manhattan for a Japanese collector, completed in 2019.

The most complete and comprehensive collection of residential projects from the world's most internationally recognized and renowned architect. Though prolific in civic and commercial work, Tadao Ando first gained recognition for his residential projects, which were constructed solidly of concrete but ingeniously imbued with light and air. This exhaustive study is a complete catalog of all his residential work to date, including two new homes just finished in 2013. This volume features unseen and unpublished works presented through lavish and striking color photographs as well as detailed architectural drawings and plans of over thirty years of Ando's residential work, from the Sumiyoshi Row House in 1975 to the current houses for global design connoisseurs and art collectors.

The newest volume in our popular Conversations series features Japanese architect Tadao Ando. One of the most celebrated living architects, Ando is best known for crafting serenely austere structures that fuse Japanese building traditions with Western modernism. His minimalist masterworks-geometric forms clad in silky-smooth exposed concrete-are suffused with natural light and set in perfect harmony with the landscape. In these highlights from lectures delivered at the University of Tokyo's Graduate School of Architecture, Ando candidly describes his experiences as a largely self-taught practitioner, tracing his development from an early interest in the traditional building craft of his native Japan through his political awakening in the turbulent 1960s to his current stature as one of the world's foremost architects. In addition to exploring his aesthetic influences and working process, Ando offers students a road map not only for maintaining professional integrity, but also for becoming effective agents of change in the world.

This comprehensive monograph on Pritzker Prize-winning architect Tadao Ando covers the span of his impressive career, with previously unpublished material and insight into his sources of inspiration. This in-depth monograph offers insight into Tadao Ando's sober and elegant architecture through photographs, architectural drawings, and descriptions of eighty of his most significant works. His notable works span the globe: London's Tate Modern; St. Louis's Pulitzer Arts Foundation; Osaka's Church of the Light; Paris's UNESCO Meditation Space; Venice's Palazzo Grassi; Abu Dhabi's Maritime Museum; and exceptional buildings in South Korea, Taiwan, China, Sri Lanka, Mexico, Germany, and throughout the United States. Japanese design principles—from the use of concrete, simple geometric volumes, and the integration of natural elements such as light or water—are essential elements that Ando uses to provoke a physical experience through his architecture. An interview with the architect accompanies his own writings and critical essays on various aspects of his work. A portfolio of Ando's black-and-white photographs and colored-pencil drawings from his previously unpublished travel notebooks provide new insight into his sources of inspiration. The book is completed with a biography and a chronology of his works to date, including some unrealized projects.

This highly original and personal exploration of Tadao Ando's work, one of Japan's leading architects, traverses both the physical and spiritual world. In 2012, Philippe Se?clier visited Tadao Ando's iconic Church of the Light, and was immediately compelled to journey around the world to further study the architect's buildings. This unique presentation of Ando's work is the result of what turned into a nine-year project to photograph 130 buildings. Walking around each structure, trying to find the proper framing, helped Se?clier understand Ando's genius for siting and composition. Loosely organized by chronology, each building is represented in numerous black and white images, arranged like a mosaic on the page. These fragmented views correspond to Ando's own philosophy of the logic of structure and geometry. This "atlas" embraces not only the geographic but also thematic range of Ando's oeuvre—from transit stations in Tokyo and Kobe to art museums in Fort Worth, Texas and Provence, France; from an artists' retreat on the Mexican coast to the now-demolished Piccadilly Gardens in Manchester, England; from a theater in Milan, Italy, to an upscale restaurant in New York City. Se?clier's photographs of Ando's numerous religious structures brilliantly illustrate his use of light and shadow to evoke spiritual depth and timelessness while his short texts offer concise observations of each building. A helpful appendix pinpoints the geographic diversity and range of Ando's oeuvre.

A new edition of the acclaimed portfolio of work by Japan's leading architect, now featuring digitally remastered photographs. "The magnificent photographs by Richard Pare come as close to putting you there as any publication is likely to achieve." —The New York Times An exquisite work of art in its own right, this book is the result of ten years' collaboration between the English photographer Richard Pare and the internationally renowned Japanese architect Tadao Ando. This new edition features all the same extraordinary photographs, completely remastered from the original negatives, bringing this beautiful volume back to life. Pare's remarkable images shed new light on this important body of work, while Ando's original line drawings and sketches provide unparalleled insight into his creative process.

Tadao Ando é provavelmente o mais importante e influente arquiteto japonês trabalhando na atualidade. É famoso por suas composições sóbrias e rigorosas, como também pelo uso do material - notadamente concreto. Este novo exemplar da coleção Arquiletos cobre todos os seus projetos e construções importantes, incluindo os mais recentes.

Combining influences from Japanese tradition with the best of Modernism, Ando has developed a completely unique building aesthetic that makes use of concrete, wood, water, light, space, and nature in a way that has never been witnessed in architecture. This book presents the illustrious career of the only architect ever to have won the discipline's four most prestigious prizes. 3-8228-2164-0\$125.00 / Taschen America LLC

A survey of the extensive series of museums designed and built by Tadao Ando in Japan, Europe and the USA. Ever since Tadao Ando started to establish himself more than thirty years ago as one of the best designers on the international scene for the rigour and character of his works, his intense activity has moved tirelessly between private residences and public buildings. Each of these works has added a small piece to the construction of a cohesive path based on a strong and clear use of geometry, the employment of few materials in the right proportions, the harmony of the spaces and a strong sense of the relationship with the landscape. From this point of view, the series of museums designed by Tadao Ando tells of the Japanese master's design philosophy perfectly.

A complete catalogue of the work of the renowned Japanese architect.
